**Public Notice: Disclosure of Environmental and Social Commitment Plan (ESCP), Environmental and Social Management Plan (ESMP) and Stakeholder Engagement Plan (SEP) for Liberia Contingent Emergency Response Project**

The Government of Liberia (the Borrower) will implement the Contingency Emergency Response Project (the Project), with the involvement of the Infrastructure Implementation Unit (IIU) within the Ministry of Public Works, as set out in the Financing/Grant Agreement (the Agreements). The International Development Association (the Association) has agreed to provide financing for the Project, as set out in Agreements.

This notice serves to inform the general public that the Government of Liberia, through the Ministry of Public Works' Infrastructure Implementation Unit (IIU), has prepared the following key environmental and social documents for the road project:

1. **The Contingent Emergency Response Project (CERP):** The CERP is a critical mechanism for Liberia, designed to provide rapid and flexible financial support in the wake of emergencies and disasters. It can be triggered by the Government through an official declaration that an eligible emergency or disaster has occurred, supported by a Declaration of activation of the National Contingency Plan. The Bank is offering to provide the Republic of Liberia with just-in-time support for preparedness planning through a Contingent Emergency Response Project (CERP).

2. **Stakeholder Engagement Plan (SEP):** The SEP is prepared in accordance with the World Bank's Environmental and Social Standard 10 (ESS10) on Stakeholder Engagement and Information Disclosure. It sets out the framework and approach for meaningful, inclusive, and continuous engagement with all relevant stakeholders throughout the project lifecycle -from preparation through activation, implementation, and close-out. The SEP describes the ways in which institutions will communicate with stakeholders and includes a mechanism through which people can raise concerns, give feedback or make complaints about the project and any project-related activities. The SEP specifically emphasizes methods for engaging groups considered most vulnerable and at risk of being left out of project benefits.

3. **Environmental and Social Commitment Plan (ESCP):** is a formal document required by the World Bank under its Environmental and Social Framework (ESF). It outlines the borrower's commitment to implementing specific environmental and social measures throughout a project's lifecycle.

These environmental and social instruments are now being disclosed to the public to promote transparency and accountability. They are accessible at:

MPW offices and website (https://mpw.gov.lr), and local government authorities' offices.
